Ensure every lift is maintained on schedule with automatic AMC and PM alerts. Avoid missed contracts, improve service reliability, and extend equipment life. Track service history, schedule visits, and get reminders well in advance. Strengthen client trust through proactive maintenance.

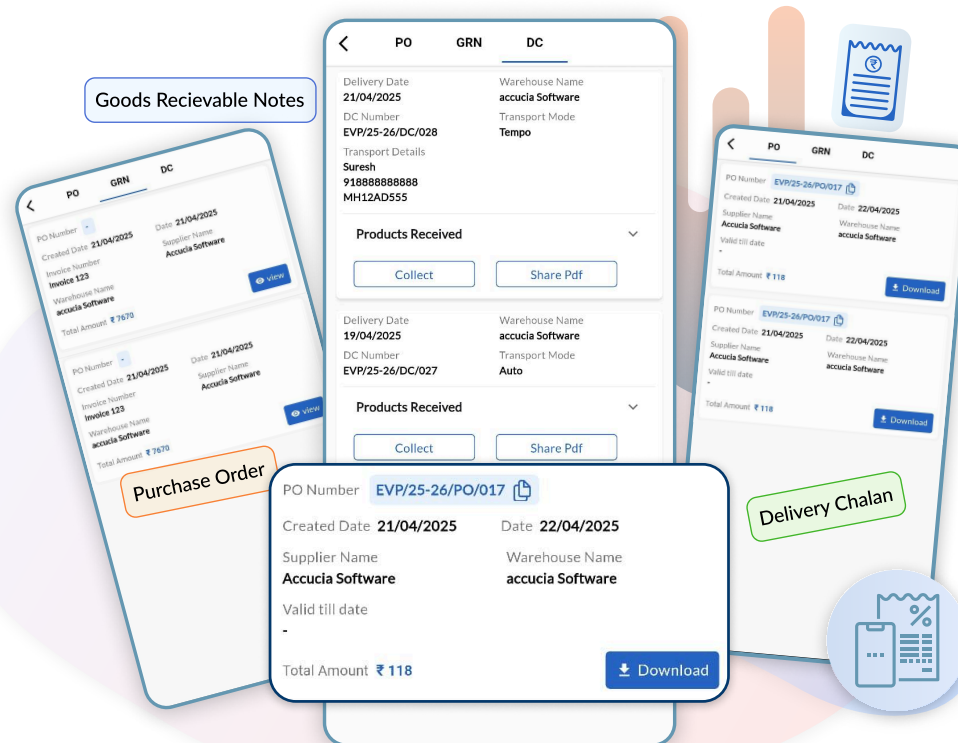

Breakdown

Create Breakdown

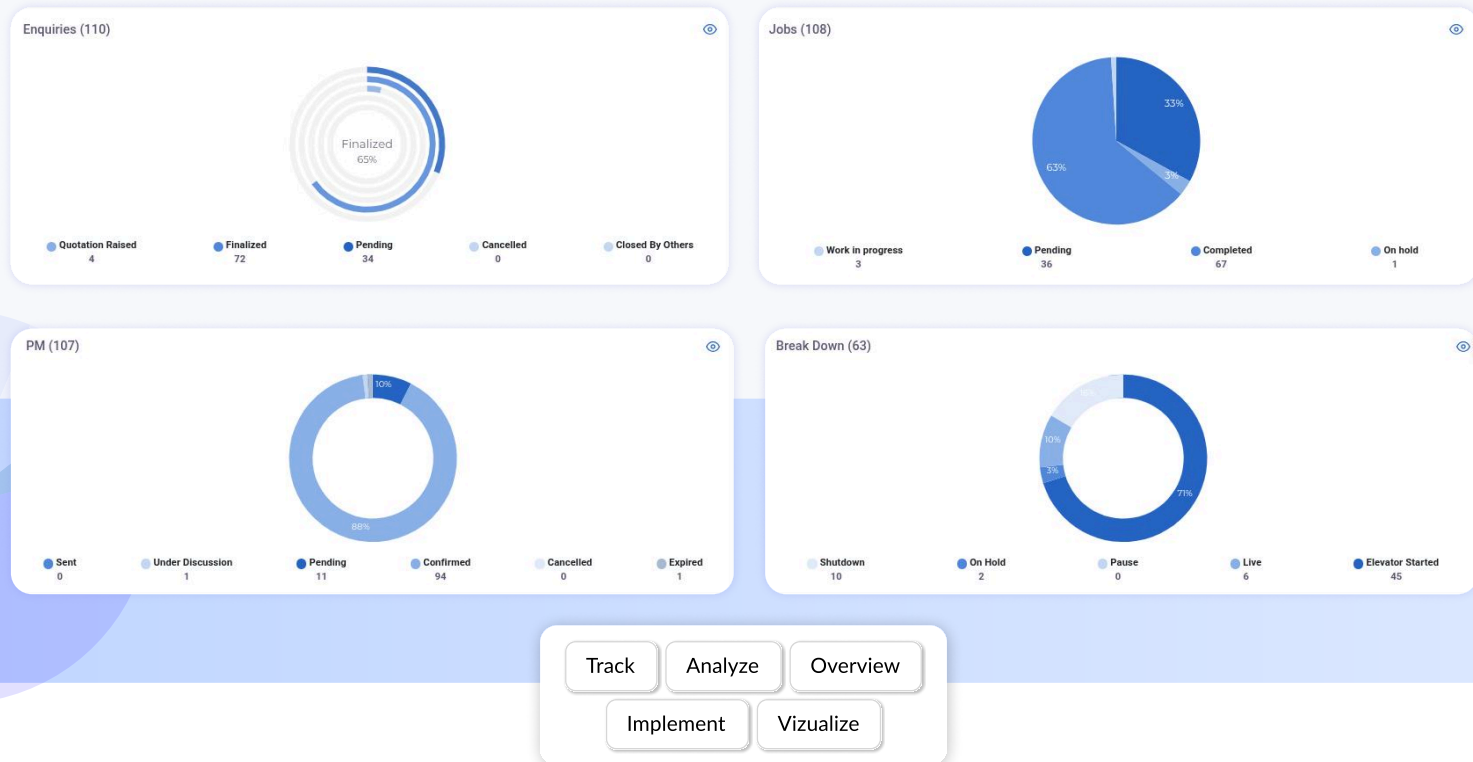

Get real-time alerts the moment a breakdown is reported. Assign the nearest available technician using location tracking and update clients immediately. Reduce elevator downtime and provide faster resolutions. Keep your service responsive and professional under pressure.

Repair Order

Log and manage every repair request with full visibility from issue to resolution. Assign tasks to the right technician, track repair status, and maintain a record for each job. Clients stay informed and satisfied with timely updates. Ensure no repair request falls through the cracks.

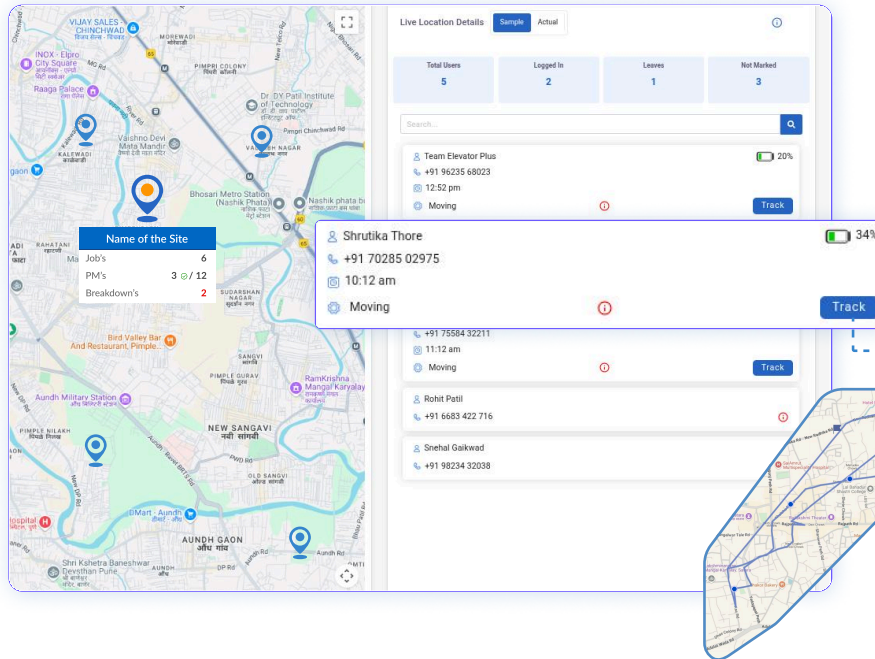

BirdEye Dashboard for Management

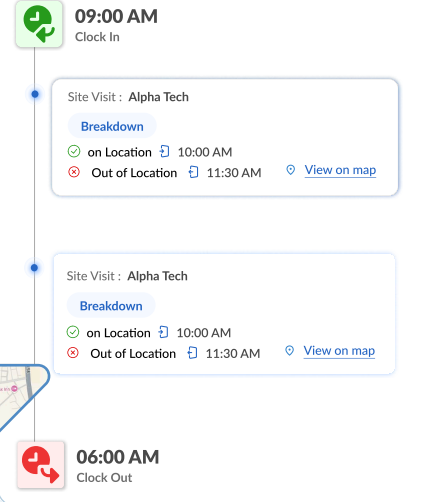

Get a 360° snapshot of your entire elevator business on a single screen. View live project updates(GANT chart), pending tasks, service requests, team activity, and BOM summaries in real-time. Make fast, informed decisions with a centralized, intuitive control panel built for elevator business leaders.

Live Location Tracking

Employee Tracking

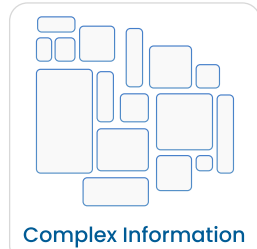

Timeline

Monitor your field technicians in real-time as they move between job sites. Know exactly where your team is, assign urgent tasks based on proximity, and boost response speed. This ensures better coordination, fewer delays, and more efficient service delivery.
